

HTML span tag

 [w3schools.com/tags/tag_span.asp](https://www.w3schools.com/tags/tag_span.asp)

Example

A `` element which is used to color a part of a text:

```
<p>My mother has <span style="color:blue">blue</span> eyes.</p>
```

Definition and Usage

The `` tag is an inline container used to mark up a part of a text, or a part of a document.

The `` tag is easily styled by CSS or manipulated with JavaScript using the class or id attribute.

The `` tag is much like the `<div>` element, but `<div>` is a block-level element and `` is an inline element.

Browser Support

Element

<code></code>	Yes	Yes	Yes	Yes	Yes
---------------------------	-----	-----	-----	-----	-----
