

HTML cite Tag

 [w3schools.com/tags/tag_cite.asp](https://www.w3schools.com/tags/tag_cite.asp)

Example

Define the title of a work with the <cite> tag:

```
<p><cite>The Scream</cite> by Edward Munch. Painted in 1893.</p>
```

Definition and Usage

The **<cite>** tag defines the title of a creative work (e.g. a book, a poem, a song, a movie, a painting, a sculpture, etc.).

Note: A person's name is not the title of a work.

The text in the **<cite>** element usually renders in *italic*.

Browser Support

Element

<cite>	Yes	Yes	Yes	Yes	Yes
--------	-----	-----	-----	-----	-----
