

# HTML ins tag

---

 [w3schools.com/tags/tag\\_ins.asp](https://www.w3schools.com/tags/tag_ins.asp)

## Example

---

A text with a deleted part, and a new, inserted part:

```
<p>My favorite color is <del>blue</del> <ins>red</ins>!</p>
```

## Definition and Usage

---

The **<ins>** tag defines a text that has been inserted into a document. Browsers will usually underline inserted text.

**Tip:** Also look at the **<del>** tag to markup deleted text.

## Browser Support

---

### Element

---

<ins>	Yes	Yes	Yes	Yes	Yes
-------	-----	-----	-----	-----	-----

## Attributes

---

Attribute	Value	Description
<u><a href="#">cite</a></u>	URL	Specifies a URL to a document that explains the reason why the text was inserted/changed
<u><a href="#">datetime</a></u>	YYYY-MM-DDThh:mm:ssTZD	Specifies the date and time when the text was inserted/changed

## Global Attributes

---

The <ins> tag also supports the [Global Attributes in HTML](#).

## Event Attributes

---

The **<ins>** tag also supports the [Event Attributes in HTML](#).

## More Examples

---

### Example

---

Use CSS to style <del> and <ins>:

```
<html>
<head>
<style>
del {background-color: tomato;}
ins {background-color: yellow;}
</style>
</head>
<body>

<p>My favorite color is <del>blue</del> <ins>red</ins>!</p>

</body>
</html>
```
