HTML fieldset tag

Example

Group related elements in a form:

```
<form action="/action_page.php">
  <fieldset>
    <legend>Personalia:</legend>
    <label for="fname">First name:</label>
    <input type="text" id="fname" name="fname"><br><br>
    <label for="lname">Last name:</label>
    <input type="text" id="lname" name="lname"><br><br>
    <label for="email">Email:</label>
    <input type="email" id="email" name="email"><br><br>
    <label for="birthday">Birthday:</label>
    <input type="date" id="birthday" name="birthday"><br><br>
    <input type="submit" value="Submit">
  </fieldset>
</form>
```

Definition and Usage

The `<fieldset>` tag is used to group related elements in a form.

The `<fieldset>` tag draws a box around the related elements.

Tips and Notes

Tip: The <u><legend></u> tag is used to define a caption for the `<fieldset>` element.

More Examples

Example

Use CSS to style <fieldset> and <legend>:

```
<html>
<head>
<style>
fieldset {
  background-color: #eeeeee;
}

legend {
  background-color: gray;
  color: white;
  padding: 5px 10px;
}

input {
  margin: 5px;
}
</style>
</head>
<body>

<form action="/action_page.php">
  <fieldset>
    <legend>Personalia:</legend>
    <label for="fname">First name:</label>
    <input type="text" id="fname" name="fname"><br><br>
    <label for="lname">Last name:</label>
    <input type="text" id="lname" name="lname"><br><br>
```

```
    <label for="email">Email:</label>
    <input type="email" id="email" name="email"><br><br>
    <label for="birthday">Birthday:</label>
    <input type="date" id="birthday" name="birthday"><br><br>
    <input type="submit" value="Submit">
  </fieldset>
</form>

</body>
</html>
```

Default CSS Settings

Most browsers will display the `<fieldset>` element with the following default values:

```
fieldset {
  display: block;
  margin-left: 2px;
  margin-right: 2px;
  padding-top: 0.35em;
  padding-bottom: 0.625em;
  padding-left: 0.75em;
  padding-right: 0.75em;
  border: 2px groove (internal value);
}
```
