HTML Table Padding & Spacing

HTML tables can adjust the padding inside the cells, and also the space between the cells.

hello	hello	hello
hello	hello	hello
hello	hello	hello

With Padding

hello	hello	hello
hello	hello	hello
hello	hello	hello

With Spacing

HTML Table - Cell Padding

Cell padding is the space between the cell edges and the cell content.

By default the padding is set to 0.

To add padding on table cells, use the CSS `padding` property:

Example

```
th, td {
  padding: 15px;
}
```

To add padding only above the content, use the `padding-top` property.

Add padding to the other sides with the `padding-bottom`, `padding-left`, and `padding-right` properties:

Example

```
th, td {
  padding-top: 10px;
  padding-bottom: 20px;
```

```
  padding-left: 30px;
  padding-right: 40px;
}
```

HTML Table - Cell Spacing

Cell spacing is the space between each cell.

By default the space is set to 2 pixels.

To change the space between table cells, use the CSS `border-spacing` property on the `table` element:

Example

```
table {
  border-spacing: 30px;
}
```

Exercise?

What is the correct CSS property for styling the padding inside table cells?
